

# Blast Yaw Kit

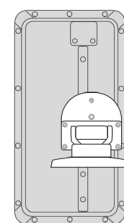

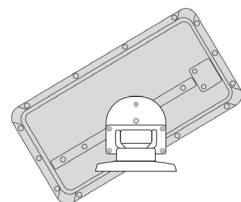

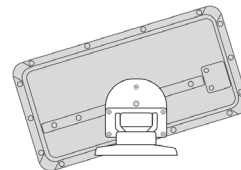

*Pan, tilt and what? Yaw, that's what. Now you can easily align Blast Powercore fixtures with asymmetric lenses to line up with artwork, headers, pillars, whatever you need, without re-installing the fixture. The yaw kit installs in a few minutes between the fixture base and head, and allows up to 90° of movement.*

**For Use with:**

- Philips Color Kinetics Color Blast Powercore
- Philips Color Kinetics eW Blast Powercore
- Philips Color Kinetics iW Blast Powercore

*The Blast Yaw Kit is fabricated entirely from stainless steel, and may therefore be used both inside and outdoors. A locking screw is provided to secure the head in position at the desired yaw angle.*

Yaw a little, or yaw a lot, now you have total control of all three axes, up to 90° rotation either way.

Be sure to consider Blast Yaw Kits when using the popular 60° x 10° and 75° x 35° Blast Powercore holographic lenses from Tempest Lighting.
